Company Name : Esquire Systems pvt Ltd

Consultant– **MeritPlus ERP**& **CTMS, Chennai-India.**

Project Summary:

This Software controls the airport warehouse .It has Three Major modules.

One is Admin, Another one is Transaction. It has two sub modules. one is Export

Control . Another one is Import Control. Overall warehouse has covered by RFID

Antennas . If any radio frequency has occurred , Rfid antenna will catch the Frequency and read the EPC codes after it will throw to Reader ,reader has understand and pass to Database .Next Step Shipment List has Created .Each Shipment has Unique Built-no and Airway bill no with EPC tags. When Shipment exports through the Export Exit Terminal ,Export Exit Zone Antenna absorbs the RF Waves of Appropriate Shipment tag . It checks against Shipment. Now System has checked delivering Shipment Built no in database built list .if both are same ,it considers proper delivery, anything else it is wrong delivery. Any one of the goods has missing Suddenly informed to the Admin Part .Alert Speaker will raise Sound. Monitor has missing Shipment AWB no. Admin module [It controls the overall process, provides master data, and holds the reader and Antenna details . IP-Address & MAC Address details, Reports.

Import process has reverse of Export

Technologies Used: CoreJava, Servlet, jsp 2.0, Swing, xml, Mysql 5.0.

Harware Kit : Alien RFID Reader ALR-8800, Multi static Antennas

Responsibilities: Development & Production Support

Duration   : 17-Feb-2010 to 21- Feb- 2011
